Author index

Arditi, D., 3
Baron, T., 17
Bennett, J., 183
Bishop, D., 119, 233
Brett-Jones, A. T., 91
Burrows, B. G., 199
Flanagan, R., 157
Holt, L., 57
Koseoglu, H., 3
Lansley, P., 145
Legard, D. A., 31
Leopold, E., 119, 233
Lewis, B. T., 217
Norman, G., 157
Selinger, S., 75
Seymour, D. E., 199
Sidwell, A. C., 47
Stamler, H., 75

Construction Management and Economics, 1983, **1**, 273–274

Subject index

Accuracy, monitoring, quantity surveyor, price forecasting, 157
Auditing, manpower, constraints, organization, flexibility, 145
Building processes, work packages, management contracting, 47
Buildings, computers, quantity surveying, 75
Client brief, project organization, project description, project management, task management, 183
Computers, quantity surveying, buildings, 75
Concrete reinforcement, cost benefit, economic appraisal, innovation, 199
Constraints, organization, flexibility, auditing, manpower, 145
Construction industry, scheduling, construction planning, critical path method, network analysis, developing countries, 3
Construction management, stochastic network analysis, interference, uncertainty calculations, performance variability, probabilistic analysis, 31
Construction planning, critical path method, network analysis, developing countries, construction industries, scheduling, 3
Cost benefit, economic appraisal, innovation, concrete reinforcement, 199
Critical path method, network analysis, developing countries, construction industry, scheduling, construction planning, 3
Design comparison, public housing, private housing, 233
Developing countries, construction industry, scheduling, construction planning, critical path method, network analysis, 3
Economic appraisal, innovation, concrete reinforcement, cost benefit, 199
Engineered performance standards, estimating, maintenance, planning, productivity, 217
Estimating, maintenance, planning, productivity, engineered performance standards, 217
Financial structure, housing design, inner cities, planning, house builders, housing market, 17
Flexibility, auditing, manpower, constraints, organization, 145
Heavy engineering, project management, work packages, 57
House builders, housing market, financial structure, housing design, inner cities, planning, 17
Housing design, inner cities, planning, house builders, housing market, financial structure, 17
Housing design, private sector, public sector, 119
Housing market, financial structure, housing design, inner cities, planning, house builders, 17
Housing, management contracts, remedial work, 91
Inner cities, planning, house builders, housing market, financial structure, housing design, 17
Innovation, concrete reinforcement, cost benefit, economic appraisal, 199

Interference, uncertainty calculations, performance variability, probabilistic analysis, construction management, stochastic network analysis, 31
Maintenance, planning, productivity, engineered performance standards, estimating, 217
Management contracting, building processes, work packages, 47
Management contracts, remedial work, housing, 91
Manpower, constraints, organization, flexibility, auditing, 145
Monitoring, quantity surveyor, price forecasting, accuracy, 157
Network analysis, developing countries, construction industry, scheduling, construction planning, critical path method, 3
Organization, flexibility, auditing, manpower, constraints, 145
Performance variability, probabilistic analysis, construction management, stochastic network analysis, interference, uncertainty calculations, 31
Planning, house builders, housing market, financial structure, housing design, inner cities, 17
Planning, productivity, engineered performance standards, estimating, maintenance, 217
Price forecasting, accuracy, monitoring, quantity surveyor, 157
Private housing, design comparison, public housing, 233
Private sector, public sector, housing design, 119
Probabilistic analysis, construction management, stochastic network analysis, interference, uncertainty calculations, performance variability, 31
Productivity, engineered performance standards, estimating, maintenance, planning, 217
Project description, project management, task management, client brief, project organization, 183
Project management, work packages, heavy engineering, 57
Project management, task management, client brief, project organization, project description, 183
Project organization, project description, project management, task management, client brief, 183
Public housing, private housing, design comparison, 233
Public sector, housing design, private sector, 119
Quantity surveying, buildings, computers, 75
Quantity surveyor, price forecasting, accuracy, monitoring, 157
Remedial work, housing, management contracts, 91
Scheduling, construction planning, critical path method, network analysis, developing countries, construction industry, 3
Stochastic network analysis, interference, uncertainty calculations, performance variability, probabilistic analysis, construction management, 31
Task management, client brief, project organization, project description, project management, 183
Uncertainty calculations, performance variability, probabilistic analysis, construction management, stochastic network analysis, interference, 31
Work packages, heavy engineering, project management, 57
Work packages, management contracting, building processes, 47
